

# Solar Power Systems

The Solar Power Systems State Contract provides a range of 1KW to 5KW solar power generation systems to assist agencies to provide sustainable energy solutions.

A range of systems including Mono-crystalline silicon, multi or poly-crystalline silicon, rigid amorphous crystalline silicon and flexible amorphous crystalline silicon are available.

Due to the complexity and wide variety of systems and configurations available, customers should consult with the service providers to determine the system that best suits their needs, and then request quotations on an individual installation basis.

## KEY BENEFITS

- Hedge against the rising cost of electricity
- Generate clean power
- Obtain rebates and tax reductions
- Sell power back to the grid
- Become power independent
- Demonstrate your environmental responsibility
- Competitive prices

## PRODUCTS & SERVICES

This contract offers a complete solar solution for registered nswbuy customers. All suppliers to this contract provide the following services to provide the appropriate Solar Power System:

- Assess your energy needs
- Assess your facility, based on available roof, ground or parking space, electric bills and rates, and access to solar incentives
- Conduct an onsite audit
- Manage all aspects of installation, approvals and maintenance
- Ensure you receive the maximum rebates and tax deductions
- Monitor performance

Mono-crystalline silicon, Multi or Poly-crystalline silicon, Rigid Amorphous Silicon and Flexible Amorphous Silicon systems are available.

## CONTRACT PERIOD

1 June 2009 to 31 May 2012

With two optional extensions of up to 12 months each that can be exercised by mutual agreement between the suppliers and the State Contracts Control Board.

## HOW TO PURCHASE

Solar Power Systems are designed and configured for specific site requirements and customer needs. Registered nswbuy customers can order goods and services directly with the supplier following assessment.
